

The aim of competition is to awaken students' conscious on the usage and necessity of maths in daily life. Because it is a fact that whether consciously or not every individual uses maths to survive in life. So the results are really satisfied for us that all the participants comment on the topic according to their understanding. We can say that all the students get the logic of usage of Maths. We intimately congratulate all the students' effort.

According to evaluation criteria,

1. Creativity
2. Originality
3. Done by students themselves (without any adult help)
4. Relevance to the topic
5. Neatness

All the teams graded seven different posters and the grades were added in the final. Winners are ordered from left to right;
