DO THE BEST WITH WASTE

Class 2B

Presentation

Hello I' m Athina and he is Hesandu, we are students of Leonardo Da Vinci High School and our class is 2°B.

Recycling

In our school in each class there are two baskets divided into: plastic and paper, then there are only two baskets for batteries and bottle caps.

Water Bottles

The whole school uses metal flasks instead of plastic bottles because in this way we make an improvement to reduce pollution.

Bike Rack

In our school we have this rack to reduce the use of the car or scooter to come to school by doing so we reduce the air pollution.

Insect hotel

Agriverde has made interventions
on biodiversity.
The insects' house was created
with the help of the students.

Lights

In our school there are lights with sensors that turn on and off automatically in order to avoid waste.
